Adam--is your story about this solely? if so, any room to wait? On background: I spent some time on this but will need til next week to get in touch with folks familiar who worked in field and with contractors. i'm looking at these notations and, as i'm sure you understand, need to check with field staff about what they mean and don't mean. unless i'm missing something?-- which is entirely possible as some of these notes are pretty rough--i don't see any reference to "spill" anywhere.

Thanks.

Let me know what we are able to clarify or talk about today. I'm definitely interested in the nature of the diesel spill seemingly indicated below and why that wasn't in the draft report, and then whether there actually was antifreeze or cement spilled (referred to as "accusations," it appears).

Thanks, Adam-- looking into these. These are clarifies that would need to come from field staff, including folks in our lab in Oklahoma that aren't in the office today.

Richard,

The reply button sent my response to a different address – just wanted to be sure this got through. Here's what I sent:

I was looking through the field notes from the Pavillion well installation and saw a couple things which I'd like some clarification on.

<ftp://ftp.epa.gov/r8/pavilliondocs/WellDrillingInformation/DrillingLogsAndCuttingsDescription/FieldActivityLogC.pdf>

On the above link, first page, bottom-right quadrant, there's a passage that appears to say "diesel fuel lost from fitting, repaired."

In the original EPA draft report, http://www.epa.gov/region8/superfund/wy/pavillion/EPA_ReportOnPavillion_Dec-8-2011.pdf, it said this:

"There were no incidents of fuel spillage used to power pumps and generators."

Next, this link:

<ftp://ftp.epa.gov/r8/pavilliondocs/WellDrillingInformation/DrillingLogsAndCuttingsDescription/DailyLogsFromDrillersJunSep2010.pdf>

If you scroll about three-quarters of the way down to Aug. 17, there's a passage where it talks about investigation accusations of antifreeze and cement spills (or at least that's what it looks like).

Last, this: <ftp://ftp.epa.gov/r8/pavilliondocs/WellDrillingInformation/DrillingLogsAndCuttingsDescription/FieldActivityLogE.pdf>
About halfway down, Aug. 18 notes, there's a mention of a "clean up effort."

Can we talk on the phone about this? That's definitely my preference with something like this. I'm just trying to figure out what these different passages mean.

For the record, this email is typically a better way to contact me. The other is a personal address tied to my cell phone, which is great when I'm out of the office.

Thanks,

Adam Voge
